

Slim & Stylish

The convenient partner to scan, copy and Email with the push of a button to make all your projects a success!

- Brightness and contrast controls to customize color output for specific applications
- Hi-speed USB 2.0 interface (USB 1.1 compatible)
- Includes TWAIN Driver
- Scan & send images to pre-defined destination with a single press

Speed, simplicity and advanced imaging for workgroup applications

Slender, functional and surprisingly affordable, the FB1200 completes any creative environment. Just 40mm thick, the extraordinarily slender is the obvious choice for the uncluttered desk. Despite its diminutive size, the FB1200 is big on resolution. Whether you are scanning documents or photos, the 600x 1200dpi and 48-bits color depth specification accurately reproduces every fine detail and subtle shade. your pin sharp results will be suitable for enlargements and post-scan image editing. Further more a "scan-to-email" function scans documents straight to e-mail, speeding up your workflow and doing away with the need for extra software.

What we have bundled

The Avison FB1200 scanner comes with TWAIN driver and is also bundled with full version of exclusive Avison Button Manager and ScanSoft PaperPort.

Avison's Button Manager Lite 3

Complete your scan in a single step

Avison's state-of-the-art software application, the Button Manager, enable you to complete complex scanning task in just a single step. When the button is pressed, the scanner automatically scan your documents and convert them to BMP, JPEG, GIF, or TIFF file formats and then send the file to a designated folder, or other destination applications such as e-mail, printer, or your favorable software application. The original step-by-step procedure is replaced with only a single touch of the button.

Fit for both first-time and experienced users alike

For first-time users, Avison's Button Manager provides a true ease-of-use with the 3 pre-configured file formats and destinations for the two buttons on the scanner. For advanced users, Avison's Button Manager makes full customization possible. For example, you can change scan settings, file formats, or even add new destination software application to fit your own scanning needs.

Avision FB1200 Flatbed Scanner

Using the Button Manager Lite

By simply pressing the button on the scanner, the scanned document will be sent to your designated destination application. Yet, before you scan, it is recommended to check the button configurations first to ensure a proper file format and a destination application.

Checking the Button Configuration before Scanning

1. After the Button Manager and the scanner driver have been successfully installed on your computer, the Button Panel will be displayed in the Windows System. Tray at the bottom right corner of your computer screen.

The Button Panel

2. The Button Panel shows the predefined scanning buttons. Right-click the button

(function) you wish to check, the Button Properties window appears.

- 1 Click to select options or setting.
- 2 The button name.
- 3 The file format of the scanned image.
- 4 The scan settings for the selected button.
- 5 The destination application. (This is the application that opens after you have finished scanning.)

The default setting is indicated in highlighted color. If you wish to change the setting, use this window to reset the setting for the file

format, destination application, or other scan settings.

3. Click the OK button to leave the window.

The Default Button Settings

The scanner is shipped with preconfigured button settings for your basic scanning tasks such as scan-to-folder, scan-to-email, and scan-to-printer. The following table shows these factory default settings. You can change

Button name	Destination	Default Scan Settings
E-mail	Microsoft Outlook Express	Color @100dpi, A4, BMP
Scan	Microsoft Paint	Grayscale @200dpi, A4, JPEG
Copy	Printer	B&W @300dpi, A4

Press the Button to Start Scanning

1. Press the button you wish to digitize your document.
2. Within seconds, the scanned image is captured and the destination application is opened in your computer screen.
